

Catherine Wolfram is the William Barton Rogers Professor in Energy and Applied Economics at MIT Sloan. From March 2021 to October 2022, she served as Deputy Assistant Secretary for Climate and Energy Economics at the U.S. Treasury. Before that, she directed the Environment and Energy Economics Program at the National Bureau of Economic Research.

Wolfram has researched energy markets, including rural electrification, energy efficiency, and environmental regulation. She's currently focused on the EU carbon border adjustment mechanism (CBAM) and climate-related trade issues.

She holds a PhD from MIT and an AB from Harvard.
