

Anna Alberini holds a PhD in economics from the University of California, San Diego, and is a professor in the Department of Agricultural and Resources Economics at UMD. She teaches PhD-level econometrics and an undergraduate course on climate change economics, while supervising graduate and undergraduate research. As an energy and environmental economist, her work centers on residential energy demand, energy efficiency, and policies influencing these areas, as well as vehicle fuel economy. She is an editor of Energy Economics, serves on the boards of The Energy Journal and Energy Policy, and has advised the US Energy Information Administration and EPA.
