

Professor, Delft University of Technology, Netherlands

Prof. Dr. Ir. Laurens de Vries is a Full Professor of Complex Energy Transitions at Delft University of Technology, specializing in energy market design and systems integration. He coordinates the Energy Systems Integration Program of the European Energy Research Alliance (EERA) and is funded by EBN for his role (2022–2026). His work includes projects on renewable electricity market design (TradeRES) and flexibility markets (DEMOSSES). Prof. De Vries holds degrees in mechanical engineering and environmental economics and earned his doctorate at TU Delft on electricity generation adequacy.
