

**Ricardo J. Raineri Bernain**

*Economist | Former Energy Minister of Chile | Past President, IAEE | Professor, Pontificia Universidad Católica de Chile*

Ricardo Raineri is an economist with recognized expertise in energy policy, infrastructure, and development economics. He has held leadership roles in both government and international institutions, including serving as Chile's Minister of Energy and as Alternate Executive Director at the World Bank, representing six Latin American countries.

He served as President of the International Association for Energy Economics (IAEE), where he contributed to expanding the association's global outreach and strengthening its role in international energy dialogue. His work has supported reforms and initiatives in energy security, market design, and clean technology across Latin America and beyond.

Dr. Raineri is a professor at the School of Engineering at Pontificia Universidad Católica de Chile and serves on the editorial board of *The Energy Journal*. He has authored numerous peer-reviewed articles, policy reports, and opinion pieces on energy markets, the energy transition, and economic development, contributing to both academic discourse and public policy debates in Latin America and internationally.
