

**Dr. Millicent Awuku** is an Economist and Lecturer at Ashesi University, Ghana, whose research focuses on health economics, environmental sustainability, and energy policy. She holds a PhD in Development Economics with a specialty in Applied Economics from the University of Ghana in collaboration with the United Nations University - World Institute of Development Economics and Research (UNU-WIDER). She is currently engaged in research projects on renewable energy, economic growth and unemployment; assessing PM2.5 exposure among Ghanaian households, bill payment recovery for the Ghana Water Limited (GWL), and integrating sustainability into business education across African business schools. Previously, she worked as a local research collaborator on the HAPFAM project by SOAS University of London, studying food consumption and nutrition awareness among school children in Accra. She has received research grants from the International Food Policy Research Institute (IFPRI) and the DANIDA Building Stronger Universities project to support local research in Ghana. Additionally, she has provided consultancy services for the World Health Organization (WHO) and the Ghana Employers Association (GEA).
